Proportion of total funding by mechanism for 2HP and 3HP (2014 – 2016)

Funding for project across organisations, 2014 and 2015

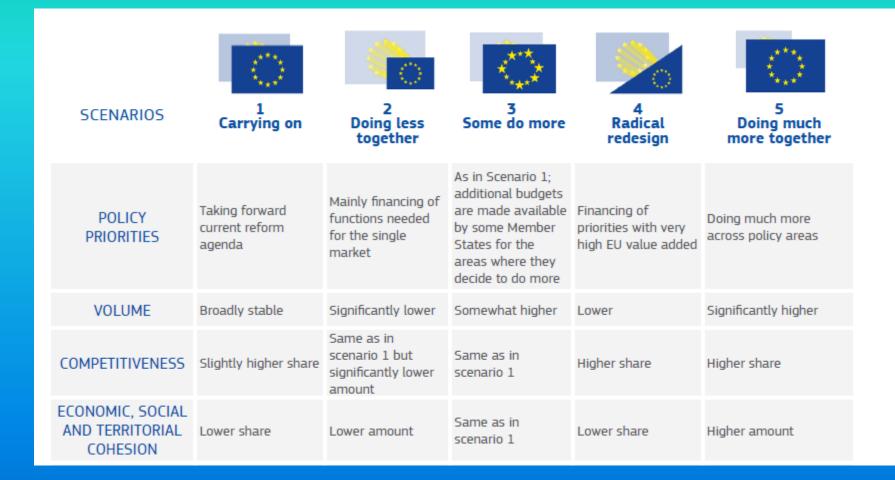

Comparative data for funding mechanisms (2014 - 2016)

According to this logic, there are five basic options for the future of EU finances.

- Carrying on: the EU-27 continue to deliver their positive reform agenda.
- ▶ Doing less together: the EU-27 do less together in all policy areas.
- ➤ Some do more: the EU-27 allow groups of Member States to do more in specific areas.
- ▶ Radical redesign: the EU-27 do more in some areas, while doing less elsewhere.
- Doing much more together: the EU-27 decide to do more together across all policy areas.

Scenario 1 Carrying on

General trend and volume

- ▶ Broadly stable
- ▶ Reflects current reform agenda of the EU-27
- ▶ Lower relative shares of cohesion and agriculture to finance new priorities
- Higher use of financial instruments and guarantees

Expenditure

- Common agricultural policy
 - Better targeted support for farmers under special constraints (e.g. small farms, mountainous areas and sparsely populated regions) and risk management tools for all farms
 - Investment in rural development (particularly agri-environmental measures)
- Economic, social and territorial cohesion
 - · Investment for all regions at a lower level
 - · Higher levels of national co-financing and use of financial instruments
 - Stronger focus on social inclusion, employment, skills, innovation, climate change, energy and environmental transition
- New priorities
 - Internal/external security, migration and border control; defence (research and development, capabilities)
- Structural reforms linked to the European Semester
 - · Positive incentives either through cohesion policy or through a dedicated fund

Scenario 2 Doing less together

General trend and volume

- Significantly reduced
- Focus on internal market functioning
- Amounts for cohesion and agriculture significantly reduced
- ▶ Much higher use of financial instruments and guarantees

Expenditure

- Common agricultural policy
 - Support only for farmers under special constraints (e.g. small farms, mountainous areas and sparsely populated regions)
 - · Risk management tools for all farms
- Economic, social and territorial cohesion
 - Support only to cohesion countries and cross-border cooperation
 - Focus exclusively on social inclusion, employment, skills, innovation, climate change, energy and environmental transition
- Single market programmes maintained (trans-European networks, customs, consumer protection, agencies)
- No financing for new priorities (security, border control, migration, defence)
- ▶ Discontinue other programmes (Erasmus+, research and innovation, aid to the most deprived, health, culture, citizenship, etc.)

Lessons learned and possible direction for post 2020

- Advocate further integration of health in the Objectives and Investment Priorities
- Direct the use of Funds towards achieving the Sustainable
 Development Goals
- Continue capacity-building support to national authorities
- Continue to provide support to health systems reforms
- Trigger stronger support to address health inequalities

Lessons learned and possible direction for post 2020

- Provide support to deployment of cost effective new technologies
- Continue support for upgrading new skills for health professionals
- Encourage definition of **better health related indicators** which would allow measuring effectiveness of the funds
- encourage development of guidance on assessment and planning of expenditures allowing for better estimation of health-related expenditures

European commission / consultations

CONSULTATION

Public consultation on EU funds in the area of investment, research & innovation, SMEs and single market

About this consultation PAGE CONTENTS 10 January 2018 - 8 March 2018 About this consultation Consultation period Policy areas Banking and financial services, Business and industry, Competition, Consumers, Target group Customs, Digital economy, Economy, finance and the euro, Digital society, Energy, Objective of the consultation Environment, Digital economy and society, Food safety, Fraud prevention, How to submit your response Institutional affairs, Justice and fundamental rights, Migration and asylum, Research and innovation, Regional policy, Single market, Taxation, Transport, Public health View the questionnaire Agriculture and Rural Development, Economic and Financial Affairs, Climate Action, Departments Responses to this consultation Competition, Energy, Environment, Migration and Home Affairs, Justice and Consultation outcome
